

Aishwarya Sharma

Business Analyst

(+91) 7506086017 | aishwaryasharma36@mail.com

Experience Summary

Technical Business Analyst with 12+ years of experience in requirement gathering, system analysis, and translating business needs into clear, actionable user stories. Skilled in JIRA, Confluence, SQL, and collaborating with cross-functional teams. Adept at managing end-to-end feature delivery, process understanding, and ensuring alignment between business teams and stakeholders.

KEY SKILLS

Business Analysis: Requirement gathering, User stories, Acceptance criteria, Stakeholder management.

Tools: JIRA, Service Now, Helix, Bitbucket, Bamboo, Confluence, SQL, MS Excel.

Technical Skills: Java, Spring boot, SQL, REST APIs, SOAP WS, Kafka.

Project Delivery: Agile/Scrum, Sprint planning, Backlog grooming, Data Migration, UAT support.

Other: Feature documentation, Release Runbook, L3 production support.

Experience

Capgemini Technology Services India Limited

Manager

Mumbai

Feb 2022 – Present

Project: Nordea Finance

- The application called as KYC Branch Tool is used by Nordea Bank operators to input details about the customer (some details auto fetched from Legacy) and based on the inputs received the same is analyzed for conducting CDD(Customer Due Diligence) or ODD(Ongoing Due diligence) and calculating risk related to private or corporate customers.
- Collaborated with business stakeholders across Nordea's KYC teams to gather requirements, analyze regulatory expectations, and translate them into detailed user stories and acceptance criteria.
- Designed and optimized end-to-end workflows covering risk scoring, PEP/RCA verification, and screening.
- Conducted gap analysis on existing KYC processes, identifying system limitations, data dependencies, and opportunities for automation to improve onboarding efficiency.
- Conducted the adoption of new NACE codes as part of the KYC enhancement initiative, ensuring accurate classification of customer business activities in line with updated regulatory standards.
- Worked closely with architects and developers for the integration between systems, customer master data, legacy systems and downstream applications.
- Managed JIRA stories and sprint activities, ensuring clear requirement breakdown, refinement, prioritization, and traceability throughout the development cycle.
- Coordinated UAT activities by preparing test scenarios.
- Closely worked with QA teams during functional and regression testing, clarifying business rules, resolving requirement ambiguities, and ensuring defect closure with minimal impact on timelines.
- Prepared and maintained detailed documentation, UML diagrams(drawio), BRD, process maps (as-is/to-be onboarding journeys), integration specifications, KYC rules definitions, and operational guidelines.
- Developed and maintained release runbooks, configuration updates, feature toggles, data pre-checks, and post-release validation steps for production readiness.
- Worked closely with the Scrum Master to maintain agile practices and promote continuous improvement within the team.
- Acting as backup Scrum Master, facilitating sprint planning, daily stand-ups, sprint reviews, and retrospectives in the absence of the primary Scrum Master.
- Ensuring timely resolution of production incidents through effective communication and collaboration with stakeholders and technical teams.
- Java, Spring Boot, IntelliJ, SQL, Service Now, JIRA, Helix, Bitbucket, Bamboo.

Genpact Headstrong Capital Markets

Consultant

Mumbai

May 2019 – Jan 2022

Project: Morgan Stanley

- Worked on application called CRISM which is used by bank operators for scheduling and managing reports.
- Collaborated with Product Owners to define Gherkin-based user stories and acceptance criteria aligned with business approval processes.
- Led data mapping and integration between internal databases and a third-party Pega application using RESTful services.
- Enabled role-based access and multi-level approval logic, ensuring reports moved seamlessly across approval stages
- Followed agile practices and actively participated in refinement, planning and retrospective calls.
- Managed change requests and enhancements, ensuring alignment with project goals and delivering solutions.
- Actively involved in all client interactions from offshore.
