Business Analysis: Requirement gathering, User stories, Acceptance criteria, Stakeholder management.

Tools: JIRA, Service Now, Helix, Bitbucket, Bamboo, Confluence, SQL, MS Excel.

Technical Skills: Java, Spring boot, SQL, APIs.

Project Delivery: Agile/Scrum, Sprint planning, Backlog grooming, Data Migration, UAT support.

Other: Feature documentation, Release Runbook, L3 production support.

Experience

Capgemini Technology Services India Limited

Senior Consultant

Bangalore

Jan 2022 – Present

Project: Nordea Finance

- The application called as KYC Branch Tool is used by Nordea Bank users to input details about the customer (some details auto fetched from Legacy) and based on the inputs received the same is analyzed with multiple other applications in Nordea with KYC application as an interface, based on the results received the risk rating of the customer is finalized.
- Collaborated with business stakeholders across Nordea's onboarding and KYC teams to gather requirements, analyze regulatory expectations, and translate them into detailed user stories and acceptance criteria.
- Designed and optimized end-to-end onboarding workflows covering customer identity verification, risk scoring, PEP/RCA verification, and screening.
- Conducted gap analysis on existing KYC processes, identifying system limitations, data dependencies, and opportunities for automation to improve onboarding efficiency.
- Conducted the Data migration of NACE codes as part of the onboarding and KYC enhancement initiative, ensuring accurate classification of customer business activities in line with updated regulatory standards.
- Worked closely with architects and developers for the integration between onboarding systems, customer master data, legacy systems and downstream applications.
- Managed JIRA stories and sprint activities, ensuring clear requirement breakdown, refinement, prioritization, and traceability throughout the development cycle.
- Coordinated UAT activities by preparing test scenarios.
- Closely worked with QA teams during functional and regression testing, clarifying business rules, resolving requirement ambiguities, and ensuring defect closure with minimal impact on timelines.
- Prepared and maintained detailed documentation, process maps (as-is/to-be onboarding journeys), integration specifications, KYC rules definitions, and operational guidelines.
- Developed and maintained release runbooks, configuration updates, feature toggles, data pre-checks, and post-release validation steps for production readiness.
- Maintaining a proactive approach in monitoring timelines and milestones, working closely with developers to adjust strategies and ensuring features success.
- Worked closely with the Scrum Master to maintain agile practices and promote continuous improvement within the team.
- Acting as backup Scrum Master, facilitating sprint planning, daily stand-ups, sprint reviews, and retrospectives in the absence of the primary Scrum Master.
- Proactively managing production incidents, applying analytical & technical skills to diagnose issues and implementing sustainable fixes.
- Ensuring timely resolution of production incidents through effective communication and collaboration with stakeholders and technical teams.
- Java, Spring Boot, IntelliJ, SQL, Service Now, JIRA, Helix, Bitbucket, Bamboo.

Genpact Headstrong Capital Markets

Consultant

Bangalore

May 2019 – Jan 2022

Project: PayPal

- Worked on application called Synapse which is used to integrate, analyze, and manage large-scale data.
- Supporting and monitoring production applications and campaigns published by the campaign owners contain data of millions of users.
- Led end-to-end requirement analysis by collaborating with business stakeholders, SMEs, and technical teams to translate functional needs into detailed user stories and process flows.
- Automated the execution of routine jobs within the Synapse application, improving operational efficiency and reducing manual intervention for recurring tasks.
- Worked with engineering and operations teams to design and validate automation scripts that streamline job scheduling, monitoring, and exception handling within Synapse.
- Managed change requests and enhancements, ensuring alignment with project goals and delivering solutions.
- Actively involved in all client interactions from offshore.
- Managed a team of 4 to address support tickets within SLA.
